

Python Placement Prac

#1

```
def is_pangram(s):  
    s=s.lower()  
    letters = set(i for i in s if i.isalpha())  
    if len(letters)==26:  
        x="it is a pangram"  
        print(x)  
s=input("enter a string")  
is_pangram(s)
```

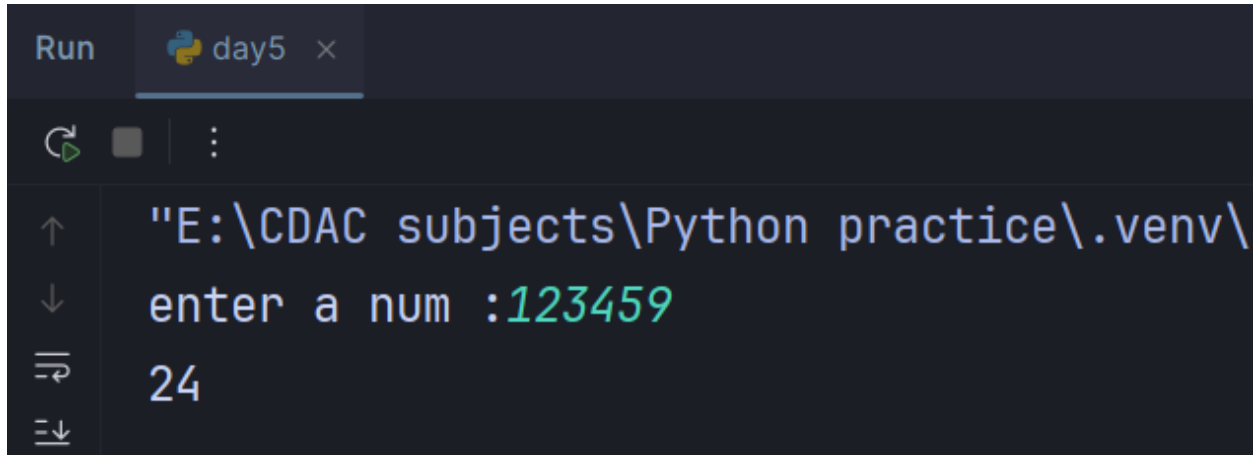

The screenshot shows a terminal window with a dark background. At the top, there's a tab labeled 'day5' with a close button. Below the tab, there are icons for running, stopping, and refreshing. The terminal output shows the command prompt 'E:\CDAC subjects\Python practice\.venv\Scripts\python.exe' followed by the input 'The quick brown fox jumps over the lazy dog'. The program then outputs 'it is a pangram'.

```
"E:\CDAC subjects\Python practice\.venv\Scripts\python.exe" "E:  
enter a stringThe quick brown fox jumps over the lazy dog  
it is a pangram
```

#2

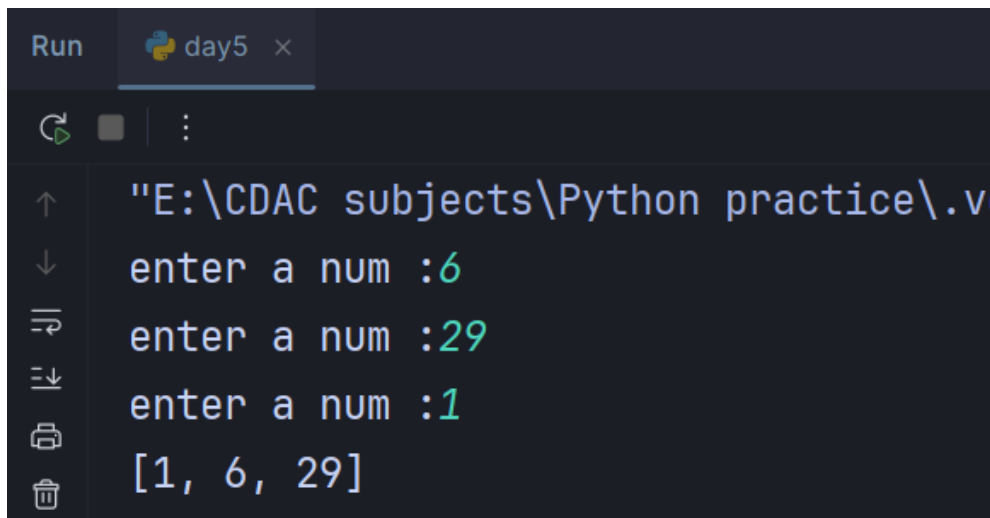

```
n=int(input("enter a num :"))
sum=0
for i in str(n):
    sum=sum+int(i)
print(sum)
```

```
Run day5 x
"E:\CDAC subjects\Python practice\.venv\
enter a num :123459
24
```

#3

```
n=[int(input("enter a num :")) for i in range(3)]
print(sorted(n))
```

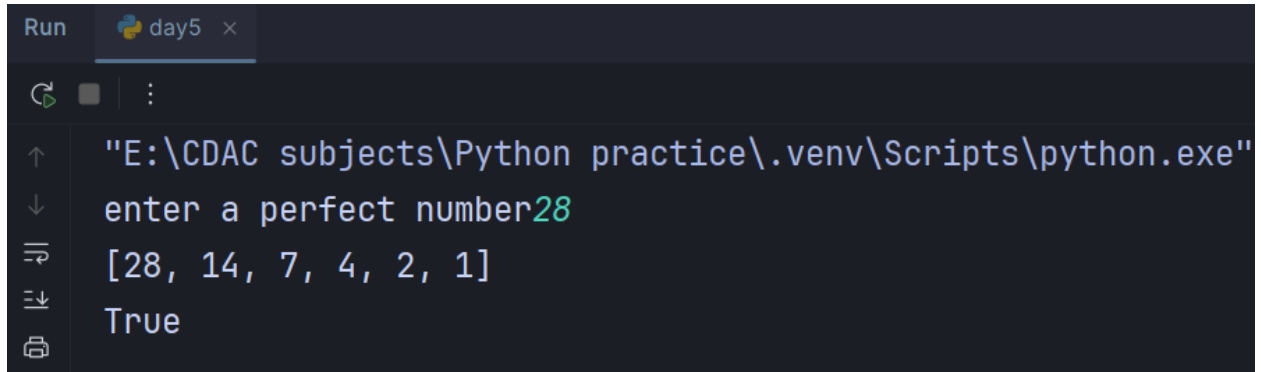

```
Run day5 x
"E:\CDAC subjects\Python practice\.venv\
enter a num :6
enter a num :29
enter a num :1
[1, 6, 29]
```

#4

```
n=int(input("enter a perfect number"))
divisors = [int(n/i) for i in range(1,n+1) if (n/i).is_integer()]
```

```
print(divisors)
if sum(divisors)==n*2: print("True")
else: print("False")
```

The screenshot shows a terminal window with a dark background. At the top, there is a tab labeled "day5" with a close button. Below the tab, there are icons for running, stopping, and refreshing. The terminal output shows the execution of a Python script. The first line is the file path: "E:\CDAC subjects\Python practice\.venv\Scripts\python.exe". The second line is the prompt "enter a perfect number" followed by the input "28". The third line is the output "[28, 14, 7, 4, 2, 1]". The fourth line is the output "True".

```
Run day5 x
↑ "E:\CDAC subjects\Python practice\.venv\Scripts\python.exe"
↓ enter a perfect number28
↩ [28, 14, 7, 4, 2, 1]
⇓ True
