

PYTHON PREP 6

#1

```
def is_pangram(s):  
    s=s.lower()  
    letters = set(i for i in s if i.isalpha())  
    return len(letters) == 26
```

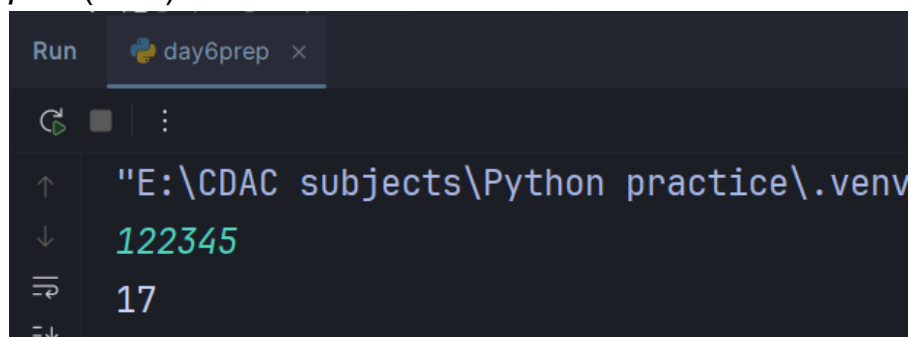

```
print(is_pangram("The quick brown fox jumps over the lazy dog"))
```

A screenshot of a Python IDE terminal window. The window has a dark background and a tab labeled 'day6prep'. The terminal shows the command 'print(is_pangram("The quick brown fox jumps over the lazy dog"))' and the output 'True'. The cursor is positioned at the end of the output.

```
Run day6prep x  
"E:\CDAC subjects\Python practice\  
True
```

#2

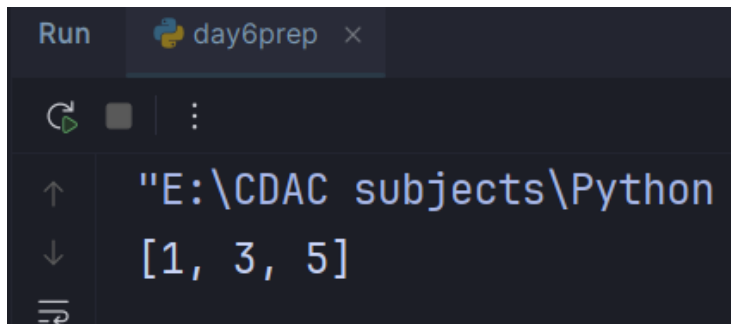

```
a=int(input())  
sum=0  
for i in str(a): sum+=int(i)  
print(sum)
```

A screenshot of a Python IDE terminal window. The window has a dark background and a tab labeled 'day6prep'. The terminal shows the command 'a=int(input())' followed by the input '122345'. The output of the program is '17'.

```
Run day6prep x  
"E:\CDAC subjects\Python practice\.venv  
122345  
17
```

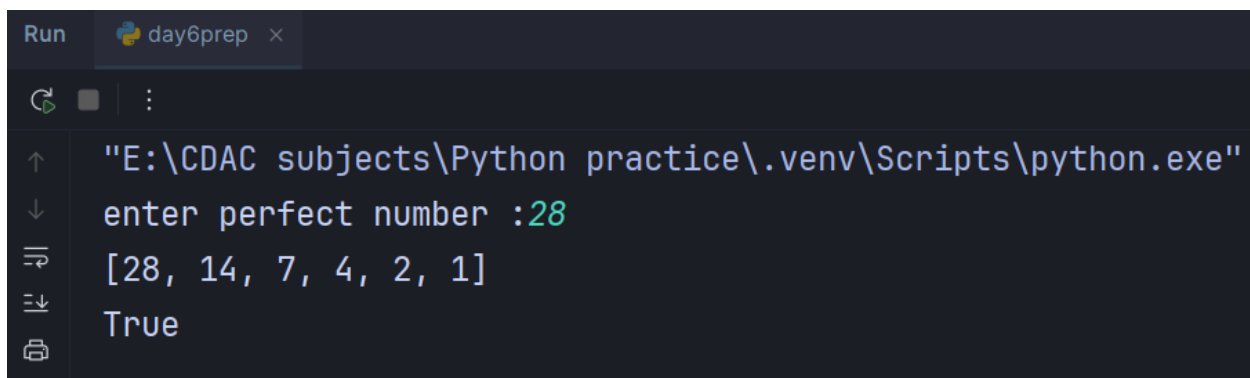

#3

```
l=[1,2,3]
print(sorted(l))
```

A screenshot of a Python IDE terminal window. The window has a tab labeled 'day6prep' and a 'Run' button. The terminal shows the command `print(sorted(l))` and its output `[1, 3, 5]`. The path `"E:\CDAC subjects\Python"` is visible above the output.

```
#4
n=int(input("enter perfect number :"))
divisors = [int(n/i) for i in range(1,n+1) if (n/i).is_integer()]
print(divisors)
if sum(divisors)== n*2 :
    print(True)
else:
    print(False)
```

A screenshot of a Python IDE terminal window. The window has a tab labeled 'day6prep' and a 'Run' button. The terminal shows the command `enter perfect number :28` and its output `[28, 14, 7, 4, 2, 1]` and `True`. The path `"E:\CDAC subjects\Python practice\.venv\Scripts\python.exe"` is visible above the input.
